### **Addonics Announces Family of Micro SATA Storage Devices**

SAN JOSE, CA, October 20, 2009 -- Addonics Technologies ([www.addonics.com](http://www.addonics.com)) today announced a family of two storage devices that allow any 1.8" micro SATA hard drive or solid state drive (SSD) to be used like a removable drive cartridge, and an adapter that enables a standard CF media to be used as a 1.8" Micro SATA storage media

One of the new devices, called the Pocket Micro SATA UDD, is a compact and light (5 ounces) external storage device that attaches to any computer via the eSATA or USB connection. Another product, called the Internal Micro SATA UDD, is an internal device designed to mount inside a standard 3.5" drive bay. The internal device can be connected to a high performance SATA port or a USB 2.0 port.

The two storage devices come with a front drive slot that allows a Micro SATA HDD or SSD drive to be added or removed like floppy media when connecting to hot swappable SATA ports or USB ports.

The Pocket Micro SATA UDD has a suggested retail price of \$45 and the Internal Micro SATA UDD has a suggested retail price of \$39.95.

The third product is the Micro SATA CF adapter. It enables the use of Compact Flash (CF) media as a replacement for the Micro SATA hard drive in iPODs or sub-notebooks. Once installed, the CF media behaves like the Micro SATA SSD with low power consumption and fast access time. It is shock resistant.

Suggested list price for [the](#) Micro SATA CF adapter is \$23.99.
